

- Message Logging

- Log Info

Provides basic info about app

- Log Warning

Lets user know that pet stats are low

- Log Error

Pet is dead

- Log Table

List of Pets

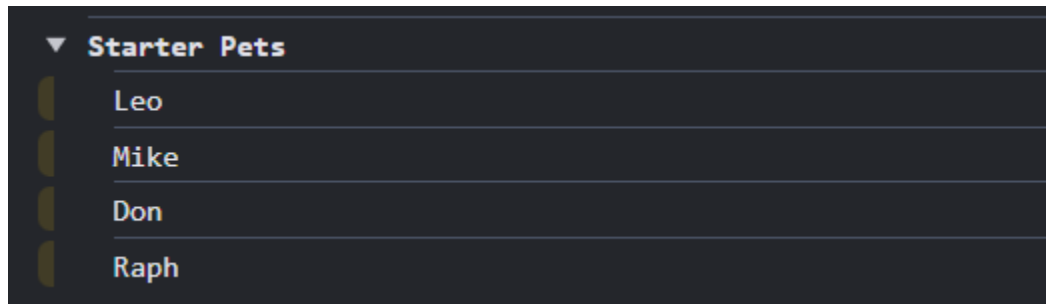

A screenshot of the Chrome DevTools Console showing a table log entry. The table has 4 columns: '(index)', 'first', 'last', and 'birthday'. It contains 3 rows of data. Below the table, it says 'Array(3)'. The source 'script.js:144' is on the right.

(index)	first	last	birthday
0	'Pet1'	'Pikachu'	
1	'Pet2'	'Squirtle'	'18930113'
2	'Pet3'	'Charmander'	

Array(3)

- Log Group

- Filter Messages
 - Filter by log level

- Filter by text

```
const filters2 = {  
  level: "",  
  text: "Pet",  
  regex: "",  
  source: "",  
  user: ""  
};
```

- Filter by regular expression

```
const filters3 = {  
  level: "",  
  text: "",  
  regex: "pet",  
  source: "",  
  user: ""  
};
```

- Filter by message source

```
const filters4 = {  
  level: "",  
  text: "",  
  regex: "",  
  source: "pet",  
  user: ""  
};
```

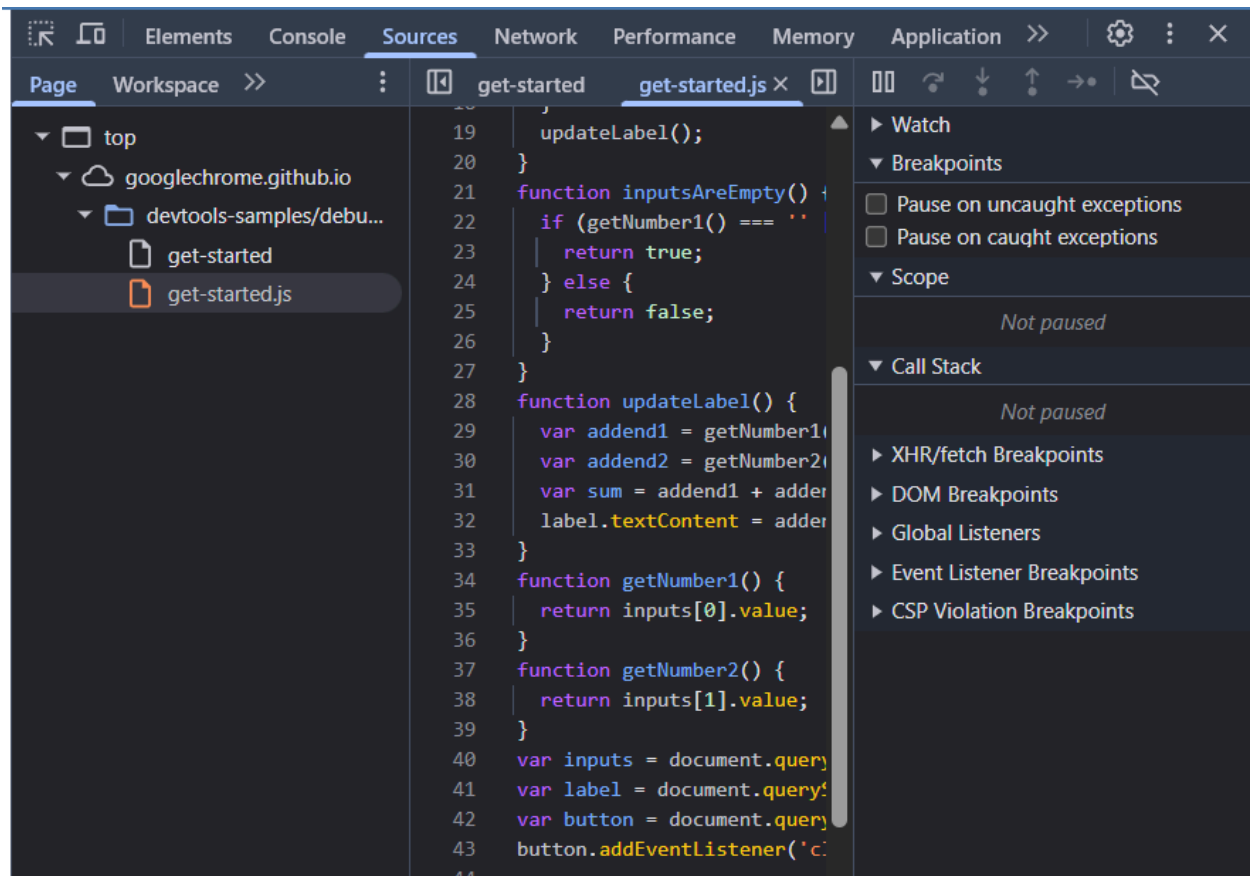

- Filter by user messages

```
const filters5 = {  
  level: "",  
  text: "",  
  regex: "",  
  source: "",  
  user: "system"  
};
```

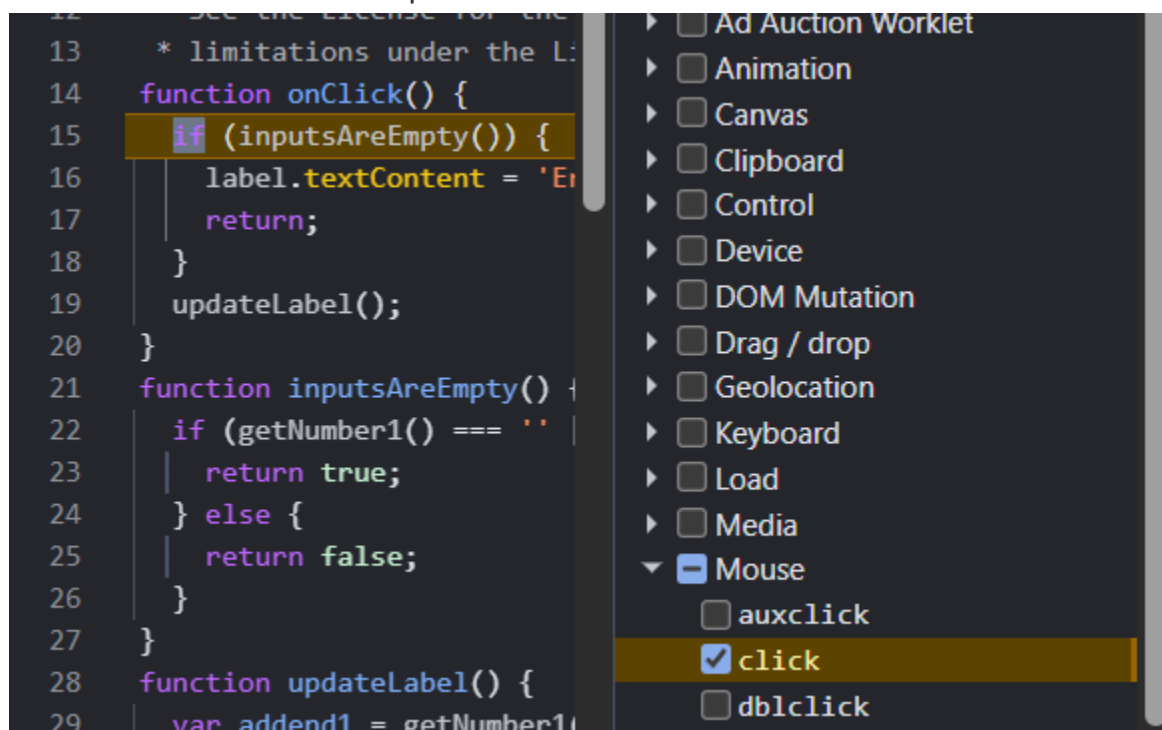

- Reproduce a bug,
Off by one bug

```
// if(pet_info.happiness = 0) {
```

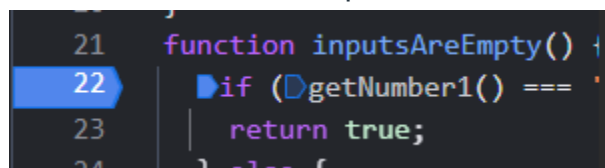

- Get Familiar with the Sources UI,

- Pause the code with a breakpoint

- Set a line-of-code breakpoint,

- Check variable values,
 - The Scope Pane
 - Watch Expressions,
 - The Console,

- Apply a fix

Fix conditional

```
if(pet_info.happiness <= 0){ // And the solution.
```
